CALIFORNIA CAMELLIA GARDENS  
(Formerly VALLEY GARDEN SUPPLY CO.)  
13531 FENTON AVE., SAN FERNANDO, CALIF.

LAUREL LEAF

Dear Friend:

We are especially proud and happy to present this offering of our camellias and azaleas for 1953. Many of you have known and traded with us for the past sixteen years at our old location—VALLEY GARDEN SUPPLY COMPANY, North Hollywood, California. Due largely to your loyalty, we have been enabled each year to increase our production and to widen our distribution.

Late last year we decided to move our entire operations to our growing grounds and to limit our retail business to MAIL ORDERS only so that we would not remain a factor in competition with our own local wholesale customers. Our "CALIFORNIA CAMELLIA GARDENS" label is your assurance of excellence.

Our retail and wholesale shipping facilities have been expanded to accommodate the greatly increased demand for our camellias and azaleas. Our search for the best varieties and superior strains continues as a very important phase of our program for improvement. We are determined to continue to offer to you, our customer, the finest quality and the most efficient and satisfactory service of any grower in the business.

Please be assured that our interest in you does not cease at the conclusion of a sale. We are anxious to be able to serve you at any time. To our many "old" customers and friends, we say "Thank You" for your patronage—and to all of you friends, old and new, we're going to keep our hard earned reputation, "The Best in the West". It is our great pleasure to present you with this beautiful new catalogue—we know you and your friends will spend many happy hours with it.

Sincerely,

*Ed. Arnesen David Cook*

### PURITY

# The Camellia Sasanqua

It would seem that here is a species of plant whose relatives are so supremely proud, jealous and domineering that they have nearly succeeded in completely obliterating from the garden scene this priceless gem. If the Sasanqua camellias were known by the name "Sasanqua" alone, they could have long ago attained the heights of popularity they so richly deserve. It is more than just passing strange that so many otherwise discerning gardeners, constantly in search of something new and better for the garden, have to be literally "clubbed" into an acquaintance with the Sasanqua. Now it develops, the skeleton in the closet is named "Camellia"!!

Because these Sasanqua flowers are not of gigantic proportion, nor stiffly and primly formal, nor of sufficiently gross construction to be useful as a corsage subject and in other ways bear but the slightest resemblance to a "camellia", they have been scorned as a poor relative. The sasanqua truly does not need to lean on the name "camellia". It is, in many ways, far superior to the Japonica (the commonly known camellia). To mention a few:—it is generally lightly and rather elusively fragrant; it is much harder; blooms more heavily at a younger age and at an earlier time of the year than the Japonica. It may be used in many ways the Japonica may not. It will charmingly adapt itself to uses really unique among flowering evergreen shrubs. It will stand a great deal of sun, of cold, of pruning and of neglect!

This is not a sales talk, it is a simple and honest endeavor to acquaint you with one of the finest and most useful shrubs we have ever known. Don't keep dodging the Sasanqua—you're bound to turn to them someday, but just try a few of them in your garden this season. We are sure you will become as enamored of them as we are!

### METHODS OF SHIPMENT—IMPORTANT

We are proud of our Shipping Department and we have countless complimentary letters from Out-of-State purchasers of our Camellias and Azaleas. Shipments of camellias to residents of the States of Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee and Virginia will be bare-rooted of soil immediately prior to shipment and repacked into proper containers with pure German peat moss. Plants so treated are accorded the same guarantee as all of our camellias. To all other parts of the country, camellias are shipped in the containers they have been grown in, undisturbed. Particularly gratifying are the letters from nurserymen residing in those southern states affected by the bare-root ruling of the Southern State Plant Board. Bare-rooted and repacked plants are especially lightweight, they arrive at destination in nursery-fresh condition, in carefully planted containers and may be safely carried in stock until sold or planted at any convenient time.

All stock is carefully selected by well qualified nurserymen and is expertly and efficiently packed. Of the countless thousands of camellias that we have shipped, bare-rooted or otherwise, we have been notified of less than a score that have either failed to thrive, to be satisfactory in every respect, or that have been damaged in transit. Of these plants so reported, we have been more than happy to make replacements at no charge.

Crating charges are based upon our actual costs for the cartons alone, and we make every effort to do the packing as economically as possible. Your interests are best served if you make your orders conform to the actual crate capacities. This greatly expedites the packing and will result in savings to you not only in crating costs, but in the shipping costs per plant as well. Please estimate from the following schedule the number of cartons needed to ship your order, and include this amount with the order. Unless your account has been otherwise arranged with us, no orders will be shipped C.O.D., please enclose your check or money order with your list.

**SETSUGEKKA** A large flat single. White petals are just faintly flushed with a pinkish lavender. Petal tips are ruffled, the back side of the petals is quite definitely a darker lavender. 1 gal. gft. - \$4.00

**SHISHIGASHIRA** A bright and very daintily beautiful semi-double to double rose-red, dark, glossy green foliage. This is one of the best. 1 gal. gft. - \$4.00

**SHOWA-NO-SAKAE** We wish we could grow all we could sell of this one! It is really a dandy. Flowers are large, irregular double to peony form. A lavender-pink beauty. 1 gal. - \$2.50; 3 gal. - \$7.50

**SNOWFLAKE** Truly dainty and pure as a snowflake. A large single white. 1 gal. gft. - \$5.00

**SUPER ROSEA** A large dark pink, blending to red at the petal edges. This is an excellent variety, good foliage and wonderful flowers. 1 gal. gft. - \$4.00

**TANYA** A deep rose pink single. This variety is highly suitable in mass plantings. 1 gal. - \$2.00

**TAIZAN-HAKU** Large, single white. 1 gal. gft. - \$5.00

**TOTENKO** Here's a truly lovely light pink single. Adapts itself readily to espalier display. 1 gal. gft. - \$4.00

**ROSEA MAGNIFICA**. A large single light pink, overtone of lavender. 1 gal. gft. - \$4.00

**WHITE DOVES** (Mine-no-yuke) A porcelain white semi-double to full peony form. A distinctly beautiful blossom. A beautiful espalier. 1 gal. - \$2.00; 3 gal. - \$7.50

**WILLIAMS LAVENDER** (Hybrid Saluenensis Japonica) A really charming flower. A single lavender-pink, having beautifully arranged stamens. 1 gal. gft. - \$5.00

Shipments are handled by Railway Express Agency, charges collect, unless we are specifically instructed to ship by other means. All plants in all sizes are fitted into custom-built corrugated cartons—strong, tamper-proof and extremely light in weight. You pay an absolute minimum for shipping charges and the plants arrive in any part of the country fresh, insured and guaranteed.

## AZALEAS—*The Perfect Companion Plant*

Our azaleas are evergreen, handsome bushy little plants, heavily budded and just full of vitality. Our principal stocks are of the Belgian-Indica strains; these produce the very large and double ruffly flowers, and bloom over a very long period, but we also grow lots of the very fine Kurume types (these open in one tremendous burst of glory, are somewhat hardier than the Indica, and the flowers are generally just a little bit smaller, sometimes single) and Pericats (flowers usually borne in very full clusters, some are tightly rolled little sweetheart rose-type buds, and others are quite open; they all, as a group, seem to be the very fastest growers).

We strongly urge you to try azaleas, their display is unsurpassed during the Winter and Spring months. No one needs deny himself the very real pleasure these little gems can provide, for they may be easily cared for indoors in those sections of the country where the winters are too severe for outdoor culture.

**ADRIAN STUYART** A recent introduction, large royal purple double blossoms, beautiful foliated and strong growing plant. Blooms at Easter. (Indica)

**ALBERT ELIZABETH** An immensely popular and highly attractive variety. The flowers are double, white, with bright pink bordering, handsome glossy foliage and excellent growth habit. (Indica)

**AVENIR** Very large coral to salmon pink double blossoms, borne in great profusion from Thanksgiving through early spring. Compact habit of growth and a most welcome habit of first to bloom. (Indica)

**BRILLIANT** A truly brilliant, glowing dark red double. An early Spring crop of large flowers. (Indica)

**\*CARDINAL** (Brooks Hybrid-Patented) Produces beautiful ruffled hose-in-hose blooms, with an undertone of

orange. Growth habit is more compact than Kurume azaleas. Our first offering of this new strain.

**CHARLES ENCKE** A very neatly striped flower, white with rose-pink stripes. This blooms out so completely at Easter time as to entirely conceal the very compact and hardy shrub. An excellent Kurume azalea.

**CORAL BELLS** This is a top favorite with the florist trade, myriads of small clear coral pink clusters of blossoms, light green boxwood-like foliage, and an excellent habit of growth. (Kurume)

**CORAL VERAENEANA** Large double, coral pink with a frilly petal edging. Highly attractive, blooms over a long and satisfying period from late winter well into the spring. (Indica)

**COXENIA** A very strong growing large, single lavender pink. Showy in late Spring, also an excellent understock variety. (Species)

**DR. BERGMAN** Large, a unique shade of dark salmon pink, darker veinings through the petals. A new and most unusual variety, one we feel is assured a great future. (Indica)

**ECLAREUR** Another favorite with the florist trade, star shaped double, dark red, an early spring bloomer. (Indica)

**\*ECSTASY** (Brooks Hybrid-Patented) This hybrid tends toward the Belgian Indicas in flower, foliage and plant habit. The double, high centered flowers, up to 4 1/4" across, white, often striped or dashed with orchid and have yellow-green markings in the throat.

**ERIE** This is the variegated form of the popular Paul Schame. A clear salmon pink with white, large blossoms, a long blooming season, from early winter through spring. (Indica)

**ETOILE De BELGIQUE** A large deep red star shaped blossom, smaller star center, red stamens, blackish red throat markings. Blooms through the spring months. (Indica)

**HEXE** This is undoubtedly one of the best red azaleas grown. It has a wonderfully compact and bushy habit of growth, a terrific display of rather small flowers, an ideal florist variety and tops for the garden scheme with the long season of spring to early summer bloom. (Kurume)

**HEXE de SAFFELARE** Showy, rich crimson large double flower. An excellent variety.

**JANE HAERRENS** You couldn't ask for a better azalea than this - a wonderfully prolific bloomer, a deep dusty shade of pink blossoms, very handsome foliage, a symmetrical habit of growth, and a long period of bloom during the spring. (Indica)

**MARIE LOUISE** White sport of Charles Encke. Wonderful grower and a very prolific bloomer. Single. (Kurume)

**\*MELODY** (Brooks Hybrid-Patented) Very dark green, thick, glossy foliage. The fuchsia pink flowers are similar to the Kurume, being hose-in-hose—one flower inside another—but they have the size and flat opening habit of the Indicas.

**MEMOIRE SANDERS** Rich, warm red. Beautiful blooms unfurl like roses. An excellent forcing variety. Blooms earlier and more heavily than Mrs. Fred Sanders, which it otherwise very closely resembles. (Belgian-Indica)

**MME. J. VERVANE PINK** A huge deep coral pink bloom. Double. Large plants of this variety are very showy in bloom. (Belgian-Indica)

**MME. J. VERVANE VARIEGATED** A very large flowered coral pink and white. Rather slow growing, but a very lovely flower. (Belgian-Indica)

**MME. PERICAT** A very strong growing and robust blooming variety. An excellent shade of pink. A dainty double flower. Blooms in time for Easter. (Pericat)

**MME. PETRICK** A medium-sized double flower. Coppery-red. A very long period of bloom with two distinct crops - Fall and Spring. A very lovely and satisfying performer. (Belgian-Indica)

**MME. PETRICK ALBA** A white sport of Mme. Petrick. The same wonderful fall and spring crops of flowers. Like the other Petricks, this is one of the very best. (Belgian-Indica)

**MME. PETRICK SUPERBA** This is a sport of the Mme. Petrick. The same base color of coppery-pink or red, with just enough white to make a splashy display. Again we have the two distinct crops of blooms - Fall and Spring. (Belgian-Indica)

**MME. VAN GAIL** A large and lovely double coppery coral orange. (Belgian-Indica)

**MRS. CHARLES VUYLSTEK** A prolific and persistent bloomer. Huge blood red blossoms, very double in formation, on a bushy, handsomely foliaged, compact plant. (Belgian-Indica)

**MRS. FRED SANDERS** A double, ruby-red beauty. Buds open like roses, unfurl into a blaze of color to cover the entire plant. This is certainly a top favorite with everyone. For spring blooming in the garden. (Belgian-Indica)

**ORCHID FLORA** Huge, light orchid-pink blossoms, borne in generous profusion on a very strong growing plant. One of our finest in every respect. The flowers can very reasonably be compared to the orchid. Spring blooming (Belgian-Indica)

**PAUL SCHAME** This is probably the best double salmon azalea grown. A very heavy blooming variety. A display over a long period from September to April. (Belgian-Indica)

**PAUL SCHAME FRIZZLE** Essentially the same plant as the Paul Schame, with the added luxury of deeply ruffled petal edges. An instant success. (Belgian-Indica)

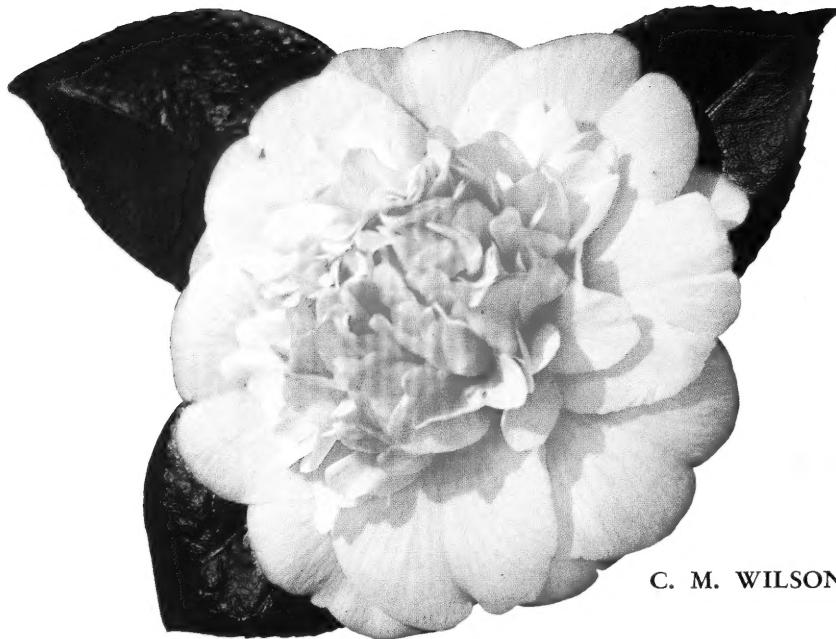

**PEARL de SAFFELARE** A most welcome addition to the always welcome whites. An excellent performer. Pure satiny white blooms, fine, rich foliage. (Belgian-Indica)

**PINK PEARL** This is certainly one of the largest and loveliest pink azaleas now offered. The flowers are double, up to three inches in diameter under average outdoor conditions, nearly four inches in the glass house. Glossy foliage, a grand grower, a real springtime beauty. (Belgian-Indica)

**PROF. WOLTERS** A genuine dazzler. This is a large flowered single, vivid red with fluted white margined petals. The throat of the bloom to the base is an intense red. A very hardy and vigorous variety with a long period of bloom. (Belgian-Indica)

**PROSPER VANDEN DEALE** Compact growing, rich ruby-red flowers. Fully double medium large blooms. A great springtime display. (Belgian-Indica)

**\*REDWING** (Brooks Hybrid-Patented) Produces beautiful, ruffled, hose-in-hose red flowers, with an undertone of orange. Compact habit of growth. Flowers compare favorably in size with the Indicas and are long lasting.

C. M. WILSON

**RUBIS** A very compact bright ruby-red. Large double flowers, well presented. (Belgian-Indica)

**SERAPHIN** A fast growing and highly desirable light pink single. In bloom for Easter. One of our fastest sellers. Everyone likes this beauty. (Kurume)

**SNOWDRIFT** This closes the blooming season with a real flourish, it follows just about all of the Indicas and Kurumes and is a reasonable bet to bloom as late as Mother's Day. Very strong growing, a real snowdrift of pure, single white flowers. (Kurume)

**SWEETHEART** Myriads of perfect little sweetheart pink blossoms, like miniature roses. An excellent Easter variety, a very strong growing plant. (Pericat)

**SWEET SIXTEEN** Still another sport of the wonderful Mme. Petrick. This is a beautiful baby pink shade, blooms fall and spring. (Belgian-Indica)

**TEMPERANCE** Here is a lilac lavender shade that has been greatly needed for the Easter parade. The flowers are large doubles, the plant is a strong upright grower. (Indica)

**THE BRIDE** This beautiful variety has huge double light pink flowers, a bushy habit of growth, very handsome dark green foliage. If it were not different from the other large pink azaleas, we wouldn't grow it. Springtime. (Indica)

**TRIUMPH** A hardy and extremely rapid grower, very large, and such fully double flowers are not to be found on any other azalea we've seen. A unique shade of red in the Spring. (Indica)

**VAN LANGHAM** A sport of the Vervaeneana Alba, a double white with pin points, stripes and splashes of red. We can't describe a typical blossom, no two are ever identical, but they are all lovely. Spring blooming. (Indica)

**VERVAENEANA** A truly lovely large double, salmon rose on a white background, with a deeper coloration at the base of the petals. Springtime. (Indica)

**VERVAENEANA ALBA** Its huge double white blossoms appear dewy, they glisten with purity. All of the Vervaeneana family are tops for their display, their habit of growth and their long blooming period in the Spring. (Indica)

**VIOLACEA** A real royal purple, fully double flower that appears in clusters all over the plant. The blooms are really multicentered. Early to late Spring. (Indica)

**WILLIAM VAN ORANGE** This is the finest single orange azalea we have ever seen. The foliage is a deep bronzy green, densely covers the plant until early in the spring, when the flowers just as densely cover the foliage. Very good, and most unusual. (Indica)
